CALCULATION APPROACH

TRADE DATA APPROACH	Y/N
Priority to reported and concluded transactions	Y
Sole-sourced data from trading principals accepted	N
Inter-affiliate data accepted as valid	N

Bids, offers and trades for 98 RON barges are used to establish the grade's value relative to the more liquid Eurobob Oxy (GX0000002) index and then calculated as an outright USD/MT price. In the absence of any physical activity, the previous day's differential to GX0000002 is held steady.
