Assessment range	2 months forward from calendar month
Load ports	Asia/Africa offshore floating terminals, Qatar
Destination restriction	None
Trading window	1600 - 1630

INDEX TIMES**TIME DETAILS**

1630 Singapore close

CALCULATION APPROACH

TRADE DATA APPROACH	Y/N
Priority to reported and concluded transactions	Y
Sole-sourced data from trading principles accepted	N
Inter-affiliate data accepted as valid	N

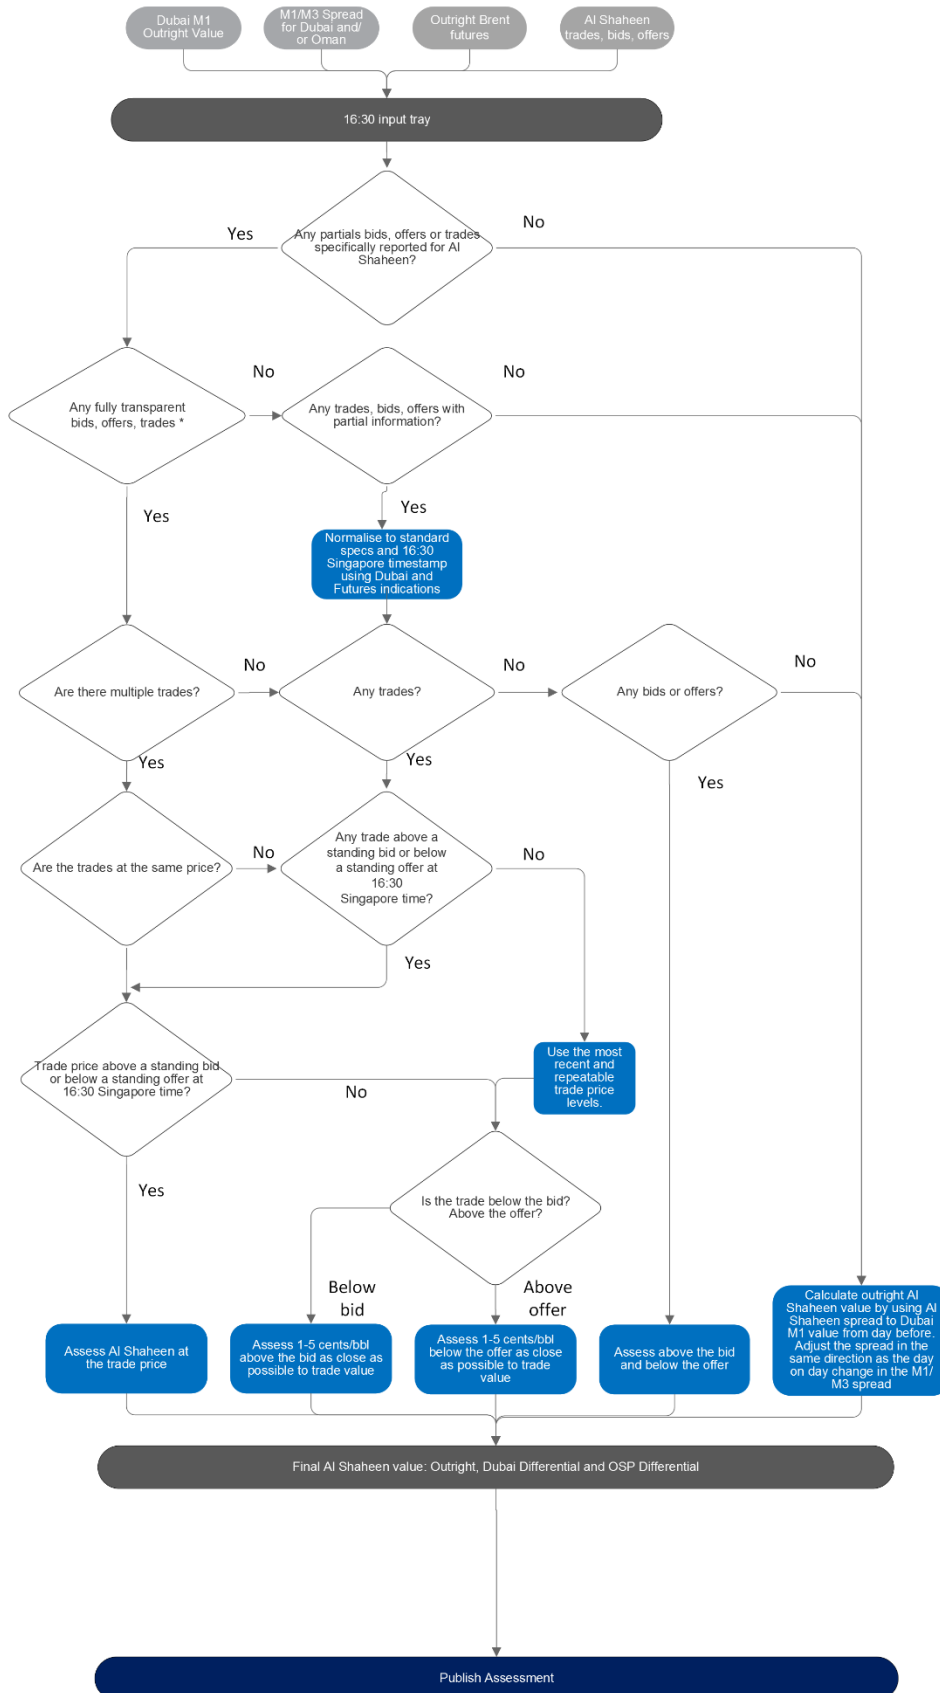

GX may consider bids, offers and swaps and futures-derived implied prices alongside trades if these are deemed more representative of market value at the midpoint of the assessment period.

Al Shaheen cargoes typically trade as a differential to an underlying reference. The underlying reference can be either the grade's official selling price or the average of the Dubai cash value in the month of loading.

Daily assessments are computed from survey information including bids, offers and trades in the Middle East spot market.
